

INTERNATIONAL DIALLING

TIME DIFFERENCES

To help you telephone at the right time, the basic time differences are shown for each country based on Greenwich Mean Time (GMT) which is from October to March

PHONING HOME FROM ABROAD

You should check that you can dial direct to the British Isles from the telephone available.

If so, dial:

- the International access code used in that country
- 44 to reach the British Isles
- the STD code, omitting the first figure 0, e.g. for Guernsey dial 1481
- the customer's number required

WHAT IT COSTS TO DIAL FROM A FIXED LINE PHONE

The charge for international calls depends on the duration and to where you are calling. Details of the fixed line charges for each country can be found on our website www.sure.com.

HOW TO MAKE AN INTERNATIONAL CALL

Dial the International access code; followed by the country code, then the area code, and finally the customer's number.

All the International codes are listed in this blue section.

A selection of area codes is listed under each country code, where applicable.

HINTS ON DIALLING

Write down the full number, including the International access, country and area codes, before you dial.

Dial the number carefully, without long pauses between digits.

After dialling, be prepared to wait for up to a minute before you are connected and hear a tone.

Tones used in other countries are different from those used in the British Isles.

TONES YOU MAY HEAR

- RINGING TONE EUROPE:** medium pitched tone with quite long pauses.
On calls to **FRANCE** a series of rapid pips may be heard, advising that the call has been connected.
- NORTH AMERICA:** low pitched bursts of tone.
- ENGAGED TONE EUROPE:** medium pitched tone with shorter pauses than for ringing tone.
- NORTH AMERICA:** medium pitched tone with short pauses.

Tones used in other countries vary considerably.

FRANCE

■ **00 33**
■ **Then Customer's Number**

A new numbering plan was introduced in France in October 1996.

For Paris and the Paris region there are no changes Dial area code 1 before the customer's 8 digit number. For French Provinces dial either area code 2, 3, 4, or 5 before the customer's 8 digit number eg for Bordeaux dial 00 33 5 nnnn nnnn

The digits to be added to customer's numbers are shown on the area map .

In case of difficulty please contact the International Operator for assistance
