

## HOW TO MAKE A NATIONAL CALL TO THE UK OR JERSEY

- Dial the national code, followed by the customer's number.
- All the national codes are listed in this pink section.

## WHAT IT COSTS TO DIAL FROM A FIXED LINE PHONE

The charges depend on the duration of the call, where you are calling and when you are calling.

Call charges can be found on our website [www.surecw.com](http://www.surecw.com) alternatively call 700700 for further information.

## HINTS ON DIALLING

- Write down the full number, including the dialling code, before you dial.
- Dial the number carefully, without long pauses between digits.
- After dialling, be prepared to wait for up to a minute before you are connected and hear a tone.
- If you hear nothing after this time, make the call again.
- If the number you want is engaged, wait a few minutes before dialling again.
- If the extension number you want is engaged, it is usually cheaper to clear down and try again.
- It only costs a few pence to make a call to find out if the person you want is available, or to arrange for them to call you back. This is cheaper than a reverse charge call.
- If you hear a recorded announcement that lines are engaged, replace your receiver and try again later.
